

Md. Mostakim Hossain | Aspiring Junior Penetration Tester / Cybersecurity Analyst

Trevose, PA | +1 (646) 934-9435 | carrearnow@gmail.com | www.linkedin.com/in/md-hossain-672298252

Professional Summary

eJPT-certified cybersecurity professional with hands-on experience conducting penetration testing, vulnerability assessments, and SOC-style investigations. Practical experience from TryHackMe labs and training programs; proficient with Nmap, Burp Suite, Metasploit, Nessus, Wireshark and report writing. Seeking Junior Penetration Tester or Cybersecurity Analyst roles.

Skills

- Penetration Testing: Nmap, Burp Suite, Metasploit, Dirb, CrackMapExec, Hydra, John the Ripper
- Vulnerability Analysis: Nessus, OpenVAS, Nikto, enum4linux
- Networking & Protocols: TCP/IP, DNS, HTTP, LAN, Secure Protocols, Wireshark, tcpdump
- Platforms: Linux (Kali), Windows
- Concepts: OWASP Top 10 (XSS, SQLi), Reconnaissance, Public Key Cryptography, Hashing, Incident Analysis
- Other: Report Writing, GitHub documentation

Certifications

- eLearnSecurity Junior Penetration Tester (eJPTv2) – INE, Feb 2024
- PreSecurity Path – TryHackMe (Hands-on Labs, 2023)

Projects & Labs

DVWA / Web Pentesting (TryHackMe labs)

Performed web assessment workflows: reconnaissance, Nmap, Burp Suite, exploited XSS/SQLi in lab environments and documented PoC & remediation.

Brute It / Hydra / Password Cracking labs

Hands-on brute-force and password cracking exercises using Hydra, John the Ripper; learned credential attack mitigation strategies.

Metasploit: Introduction & Exploitation

Familiar with basic Metasploit usage for exploitation in controlled lab environments (Metasploitable).

Linux Fundamentals (Parts 2 & 3) & Shells

Gained practical Linux command-line proficiency for pentesting and scripting tasks.

Networking Core Protocols & Wireshark / tcpdump basics

Network packet analysis and protocol understanding for traffic inspection and SOC-style investigations.

Content Discovery & Nmap: The Basics

Directory discovery and port/service enumeration; saving and analyzing scan outputs.

Public Key Cryptography & Hashing Basics

Concepts of RSA, public key basics, and hashing; applied in cryptography labs.

Active Directory Basics & Windows Command Line

Foundational AD concepts and Windows CLI for enumeration and basic exploitation prep.

Simple CTF / RootMe / Crack the Hash

CTF-style problem solving and capture-the-flag practice to apply vulnerabilities and exploit chains.

Experience

Cyber Security Analyst (Trainee) — CyberXplatar Training Institute — Feb 2024 – Present

Conducted penetration testing on web apps and networks; used Nmap, Burp Suite, Nessus; documented findings and wrote remediation reports.

Driver Partner — Uber — 2020 – Present

Managed schedules, maintained high customer ratings, and handled logistics in a dynamic environment.

Taxi Driver — LIC Taxi Management, NYC — 2014 – 2020

Client service, safety, and problem solving in real-time scenarios.

Education & Authorization

High School Diploma (US Recognized, 2017) — Pakerhat Degree College, Bangladesh

U.S. Citizen — Authorized to work in the U.S.
